

Impact Pulverizer

An extra heavily constructed machine designed to pulverize even rocks & minerals of medium hardness. Fineness ranging between 100 mesh to 300 mesh (150 to 50 microns) and in some cases upto 500 mesh. " Non concrete foundation " frame with AVM pads may be provided.

Product Description

- Grinding classifying and conveying done in one operation.
- Particle size is finer and more uniform than that obtained from machines using screen.
- No dusting from feeding hopper because feeding is done under negative pressure.
- Less dusting on output side because of use of cyclone separators.
- It runs at low speed compared to machines using screen. Hence much less maintenance.
- Easy to Clean and Wash.
- It is manually fed as normal practice. However it can be supplied with automatic feeding also.

Technical Specification

Model No.	HP	Production Hour
SMFP- 8 Baby	5 HP	30 - 60
SMFP- 12 Baby	7.5 HP	60 - 120
SMFP- 16 Baby	10 HP	80 - 200
SMFP- 20 Heavy	25 HP	220 - 350
SMFP- 25 Heavy	25 HP	350 - 500
SMFP- 32 Heavy	40 HP	600 - 800
