

## Vessels

We pride ourselves on being a premier fabricator of specialty vessels. Our design and manufacturing staff works closely with our customers to develop engineering specifications for process equipment customized to the specific industry applications.

### Property characteristics

Capacity: 100L ~ 20,000L

Jacket operating temperature: -20 ~ +200oC

Jacket operating pressure: 0.6MPa

Operating temperature of inner tank: -20 ~ +200oC

Operating pressure of inner tank: 0.2 ~ 3.5Pa

We manufacture Steel Chemical Reactor Vessels that are made using various grades of stainless steel SS304 and SS316. These vessels are mainly used in chemical and pharmaceutical industry. Our manufacturing range is from 0.5 kl to 20 kl capacity.
