

JIB CRANES

Advance Technology, Modular Construction,
Quality & Reliability Guaranteed.

Jib Cranes assist the staff and multiply human efforts, handling loads up to 6300kg precisely and effortlessly. Jib Cranes are useful especially for loading or unloading of workpieces on machine tools. These are also useful for loading or unloading of trucks. They can also become an inseparable part of a standalone workstation. Column mounted Jib Cranes are necessary when no other appropriate support near a workstation is available. Wall mounted Jib Cranes are ideal solutions for workstations located near walls or vertical structures. We offer Jib cranes in association with our partner VETTER KRANTECHNIK – Germany, a world leader in Jib crane technology . We also offer custom built jib cranes for special application for loads in excess of 20MT.
