

Tray Dryer

IPEC is one of the leading manufacturer, supplier & Exporter of Tray Dryer in Ankleshwar, Gujarat, India.

We offer a precision engineered range of tray dryer specially designed for uniform circulation of hot air in the drying chamber. The sturdily built unit is fitted with thermostatic temperature control up-to 100 degree. Oven is equipped with dry air inlet and wet air exhaust. Available in different models with options for 12, 24, 48 and 96 trays.

The Tray Dryer offered by us is used for diverse drying applications like food, electrodes, bakery, plastic & powders and drying of pigments. The Vacuum Tray Dryer is used in the industries like Pharmacy where drying and heating are the essential parts of the manufacturing process.

Features of Tray Dryer:

- All contact parts made of SS 316 as cGMP standard
- Design for uniform circulation of hot air in the drying chamber
- Heating cold and fan motor having electrical inter locking for safety of heating elements
- Electric/Steam/Thermic Fluid heating system
- Fresh air inlet and outlet air flow can be adjusted with damper control valve
