

## Distillation Column

Gaurav Engineering Company is a proven Distillation column manufacturer. Distillation is the process of separating liquid mixture into its component parts. It also known as fractional distillation. Distillation column is the heart of the distillation system. Industrial distillation is performed in distillation column which is also known distillation tower. We have manufactured simple distillation column as well as fractional distillation column with internal packing for highly complex distillation requirement.

### Benefits of using Gaurav Engineering Company Distillation Column

- Distillation column can be manufactured to accommodate packing or tray manufactured by the leading companies like Sulzer, Fine Pac Structures etc.
- Offered with the Bubble Cap column design for Alcohol distillation
- Design as per TEMS, ASME Standard & Design of Column are very simple shape & scientifically.
- Design & Mfg with stainless steel Grade SS316L, SS304L, IS 2062
- Easy maintenance and robust quality therefore more demand able in market.
- These Industrial Columns can be customized as per client's requirements and Registered with leading consultants and third party inspection agency.
- Reliable After sales support and on time delivery.
- Pharmaceutical & Bulk Drugs, Chemical Industry, Herbal Industry, Pesticides & Insecticides Industry, Food Processing Industry, Paint Manufacturing Industry, Phenol Formaldehyde Resin Industry, Starch Industry, Dyes Industry, Polymer Industry, Oil Plants, Phosphates Industry, Food & Edible Oil Industry, Detergents Industry.
