

Pneumatic Sheller

Pneumatic sheller is constructed to facilitate easy removal of husk from paddy grains. The poured grain passes between two counter-revolving rollers, resulting in the removal of the husk from the grain. This machine is available with the automatic systems that manage the pressure exerted by the rollers.

Suitable for:

Raw paddy

Steam paddy

Parboiled paddy

Model No.	SPN 4	SPN 5
Capacity of paddy, TPH	3 - 4	4 - 5
Power HP	12.5	15
Rubber roll size	10"	12"
Weight in Kgs. (Approx)	670	700

PRODUCT DETAILS:

Product Code	SPN
Power Required	12.5 HP X 1440
Rubber Roll Size	10" DMR
Motor Power	3 HP
Electricity Connection	Three Phase
Operation Mode	Semi-Automatic
Frequency	50-60 Hz
Country Of Origin	Made In India

Material	MS And Iron
Brand	Perfect Equipments
Voltage	380 V
Model Name/Number	SPV-3
Capacity	3-6 TPH
Usage/Application	For Grain
