

Dynamic Balancing

Our factory is equipped with three Dynamic Balancing Machines to ensure a trouble free and energy efficient fan.

All fans manufactured by us are precision balanced statically and dynamically as per ISO-1940 (1973)E.

Capacity 300 kg, 1ton, 3ton.

Another balancing machine 10-1000 kg. Capacity. Specially for accurate -balancing of small high speed and high pressure contrifugal fans.

APS are an established manufacturer of Industrial Fans, Air Handling, Ventilation & Air Pollution Control Equipments & Systems with the designed and engineering capabilities, manufacturing, inspection and testing facilities.
