They are rust proof in nature and offer a high performance to the customers.

Features:

- Sturdy
- High performance
- Cost effective

Specifications:

- **Material:** Stainless steel of grade SS304 and SS316
- **Size:** Client Specific(Customised)

Water Softener

Our water softeners use the reverse flow ion exchange process to soften water. Hard water enters the softener unit, the calcium & magnesium ions are exchanged by sodium ions, thus making the water soft.

The advantages of our water softener are:

- Completely skid mounted unit
- Single multiport valve operation
- Light weight & compact
- Easy to install & operate
- Anti-corrosive parts

We also manufacture various boiler accessories, like oil fired & gas fired burners. These burners are rugged in operation with cheap spares, as compared to imported burners. We also manufacture fuel tanks, water tanks, chimneys and steam separators.
