

Circles

Anmol Stainless is also the leading manufacturer of stainless steel circles. It manufactures circles of outer dimension of 100 mm to 750 mm and thickness of 0.3 mm to 2 mm. The circles manufactured here have excellent resistance from rust and we use the highest grade stainless steel. Some of the main features of our stainless steel circles are long lasting, rust free and resistance from harmful chemicals. Our products are used extensively in many industries for specific applications.
