

## Liquid packagings.

Increasing flexibility ... choose from our cad flexi series.

Most suitable for small plants with space or height constraint...

Cadetronics offers gravimetric and volumetric solutions for packaging free flowing liquids.

Our standard models cater to accommodate skus ranging from 50 ml to 200 ltr barrels.

- Simple and easy to operate
- Easy changeover
- Portable

To view our automatic packaging solutions click [here](#).

Ex proof models are available on request.

Standard models include:

Weighmetric liquid packaging (semi auto)

Liquid filler unit model: wfm-120

- Liquid filler unit model : wfm-120
- Lid pressing unit model : lp-31

Wfm-120

A simple gravimetric solution with two stage plunger type cut-off for precised, accurate filling. Catering skus from 0.5 ltr to 4 ltr or 1 kg to 5 kg. Most preferred option to fill shades with easy cleaning.

Model wfm -r120 is available with replacable tank option.

Liquid filler unit model: wfm-120

- Portable
- Ex-proof version available on request
- Low height model available on request

Suitable for:

product: (free flowing)

- Paints
- Lube oil
- Varnish
- Adhesives

Container: (open mouth)

Liquid filler unit model: wfm-110

- Liquid filler unit model : wfm-110
- Plug pressing unit model : pp-31

Wfm-110

Can be combined with plug press / cap sealer / cap tightener

Additional features with n2 purging can be supplied.

A simple tubless gravimetric solution with two stage plunger type cut-off for precised, accurate filling.  
Catering skus from 250 ml to 5 ltr. Most prefered option to fill solvents with easy cleaning.

Model wfm -r110 is available with attached tank option.

- Portable

Liquid filler unit model: wfm-120

- Ex-proof version available on request
- Low height model available on request

Suitable for:

product: (free flowing)

- Solvents
- Hardeners

Container: (narrow mouth)

Liquid filler unit model: wfm-130

- Liquid filler unit model : wfm-130
- Inner plug pressing & cap sealer unit model : pp-21

Wfm-130

A simple gravimetric solution with two stage plunger type cut-off for precised, accurate filling. Catering skus from 4 to 20 ltr. Or 1 usg to 5 usg. Most preferred option to fill shades with easy cleaning.

Model wfm –r135 is available with replacable tank option.

- Portable
- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Paints
- Enamel
- Emulsion paint

Liquid filler unit model: wfm-130

- Industrial paints

Container: (open mouth/ 4" mouth)

Liquid filler unit model: wfm-130

- Liquid filler unit model : wfm-130

Wfm-130

Can be combined with split type lidpress or crimping unit.

A simple gravimetric solution with three stage plunger type cut-off for precised, accurate filling at a faster speed. Catering skus from 4 to 20 ltr. Or 1 usg to 5 usg. Most preferred option to fill shades with easy cleaning.

Model wfm -r130 is available with replacable tank option.

- Portable
- Ex-proof version available on request

Liquid filler unit model: wfm-133

- Liquid filler unit model : wfm-133

Wfm-133

Liquid filler unit model: wfm-133

Can be combined with plug press / cap sealer / cap tightener / crimper unit

Additional features with bypass arrangement in the fill valve can be supplied.

A simple tubless gravimetric solution with two stage plunger type cut-off for precised, accurate filling.  
Catering skus from 5 to 20 ltr. Or 7.5 kg to 30 kg. Most preferred option to fill shades with easy cleaning.

Model wfm –a133 is available with attached tank option.

- Portable
- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Solvents
- Hardeners
- Thinners
- Coatings

Container: (narrow mouth) / (open mouth)

Model: cad22rw

- Model : cad22rw

Cad22rw

Liquid filler unit model: wfm-133

- Twin head filler
- Twin head lidpress
- Conveyorised can movement

A simple gravimetric solution with two stage plunger type cut-off for precise, accurate filling. Twin head filler combined with twin head lidpress allows to pack at a faster speed. Catering skus from 0.5 ltr to 4 ltr or 1 kg to 5 kg. Most preferred option to fill shades with easy cleaning.

Model cad22rw-r is available with replaceable tank option.

- Portable
- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Paints
- Enamels
- Emulsion paints
- Industrial paints

Container: (open mouth)

Model: cadw6bw-r

- Model : cadw6bw-r

Model: cadw6bw-r

Cadw6bw-r

- Single head filler with prefill
- Single head lidpress
- Conveyorised can movement

A simple gravimetric solution with two stage plunger type cut-off for precise, accurate filling. Single head filler with pre-fill combined with single head lidpress allows to pack at a faster speed reducing ergonomic load. Catering skus from 10 ltr & 20 ltr or 5 usg. Most preferred option to fill shades with easy cleaning.

Model cad6bw-r is available with replaceable tank option.

- Portable
- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Paints
- Emulsion paints

Container: (open mouth)

Model: cad3bw

- Model : cad3bw

Model: cadw6bw-r

Cad3bw

- Three head filler
- Conveyorised can movement

Can be combined with cap tightener unit

A simple gravimetric solution with two stage plunger type cut-off for precise, accurate filling. Three head filler allows to pack narrow (2" mouth opening drums) as well as open mouth drums. Catering skus from 5 ltr & 20 ltr or 1 usg & 5 usg. Most preferred option to fill thinners with easy cleaning.

- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Solvents
- Thinner

Container: (narrow mouth)

Volumetric semi auto machines

Twin head liquid filler unit model: vfm-210

- Twin head liquid filler unit model : vfm-210

Twin head liquid filler unit model: vfm-210

Vfm-210

Can be combined with lid press machine

A simple volumetric solution with syringe based filling for faster packing and drip free cut-off. Catering skus from 50 ml to 250 ml. Most preferred option to fill small pack-sizes.

Model vfm –210as is available to fill skus from 500 ml to 1 ltr with additional syringe.

- Portable
- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Paints
- Colorants
- Oils

Container: (open mouth / narrow mouth)

Liquid filler unit model: vfm-220

- Liquid filler unit model : vfm-220

Twin head liquid filler unit model: vfm-210

Vfm-220

Can be combined with lid press machine

A simple volumetric solution with syringe based filling for accurate, faster packing and drip free cut-off.  
Catering skus from 0.5 ltr to 4 ltr or 1 usg.

Model vfm –220m is available to fill 20 ltr or 5 usg with multi-stroke.

- Portable
- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Paints
- Enamel
- Emulsion paints
- Industrial paints

Container: (open mouth)

Volumetric paint doser : vfm-100

- Volumetric paint doser : vfm-100

Volumetric paint doser : vfm-100

Vfm-100

It is a dosing solution to add colour doses as per set time interval from 100 ml to 1 ltr.

Suitable for:

product: (free flowing)

- Solvents
- Colourant

Container: (open mouth)

Model: cad22rw

- Model: cad22rw

Cad22rw

Volumetric paint doser : vfm-100

- Twin head filler
- Twin head lidpress
- Conveyorised can movement

A simple volumetric solution with syringe based filling for accurate, faster packing and drip free cut-off. Catering skus from 0.5 ltr to 4 ltr or 1 usg. Twin head filler combined with twin head lidpress allows to pack at almost double speed. Catering skus from 0.5 ltr to 4 ltr or 1 kg to 5 kg.

- Portable
- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Paints
- Enamel
- Emulsion paint
- Industrial paints

Container: (open mouth)

Barrels

Liquid filler unit model: wfm-500 having bypass arrangement

- **Liquid Filler Unit Model** : wfm-500 having bypass arrangement

Wfm-500

Liquid filler unit model: wfm-500 having bypass arrangement

Model: wfm -500d available with diving arrangement for foaming liquids

- Can be combined with
- Plug press /cap tightener

A simple gravimetric solution with plunger type cut-off for precise, accurate filling. Catering skus 200 ltr.  
Most preferred option to fill lube oil or liquids with foaming characteristics.

- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Solvents
- Hardeners
- Thinner

Container: (narrow mouth)

Liquid filler unit model: wfm-550

- **Liquid Filler Unit Model** : wfm-550

Wfm-550

Model: wfm -550d available with diving arrangement.

Liquid filler unit model: wfm-500 having bypass arrangement

- Can be combined with
- Plug press /cap tightener

A simple gravimetric solution with plunger type cut-off for precise, accurate filling having bypass arrangement. Catering skus 20 ltr. To 200 ltr. Most preferred option to fill lube oil or liquids with foaming characteristics.

- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Solvents
- Thinner
- Lube oil

Container: (narrow mouth)

**Liquid Filler Unit Model:** wfm-570 having bypass arrangement

- Liquid filler unit model : wfm-570 having bypass arrangement

Wfm-570

Filling 4 x 200 ltr. Barrels on a pallet

Model: wfm -570d available with diving arrangement for foaming liquids

**Liquid Filler Unit Model:** wfm-570 having bypass arrangement

- Can be combined with
- Plug press /cap tightener

A simple gravimetric solution with plunger type cut-off for precise, accurate filling. Catering skus 200 ltr having bypass arrangement. Most preferred option to fill lube oil or liquids with foaming characteristics.

- Ex-proof version available on request

Suitable for:

product: (free flowing)

- Solvents
- Hardeners
- Thinner

Container: (narrow mouth)
