

Paste Packagings.

Increasing flexibility ... choose from our cad flexi series.

Most suitable for small plants with space or height constraint. Cadetronics offers gravimetric and volumetric solutions for packaging non-flowing liquids and paste. Our standard models cater to accommodate skus ranging from 50 ml to 200 ltr barrels.

- Simple and easy to operate
- Easy changeover
- Portable

To view our automatic packaging solutions click [here](#).

Ex proof models are available on request. Standard models include: **Weighmetric (semi auto)**

Paste filler unit model: wfm-420

- Paste filler unit model : wfm-420
- Lid pressing unit model : lp-31

Wfm-420

A simple augor type gravimetric solution with single actuator type cut-off.

Model wfm –w420 is available with wiper drive

Paste filler unit model: wfm-420

to fill products with higher viscosity.

- Portable
- Ex-proof version available on request
- Low height model available on request

Skus: 0.5 ltr to 4 ltr or 1 kg to 5 kg.

Suitable for:

products: (non-free flowing liquids / pastes)

- Adhesives
- Distemper
- Textures
- Inks
- Other viscous products

Container: (open mouth)

Paste filler unit model: wfm-10

Wfm-10

Paste filler unit model: wfm-420

A simple augor type gravimetric solution with two stage cylinder type cut-off for precise, accurate filling.

Can be combined with press type lidpress or conveyorised lidpressmodel wfm –w10 is available with wiper drive to fill products with higher viscosity

- Portable
- Ex-proof version available on request

Skus: 0.5 ltr to 4 ltr or 1 kg to 5 kg.

Suitable for:

products: (non-free flowing liquids / pastes)

- Adhesives
- Distemper
- Textures
- Inks
- Other viscous products

Container: (narrow mouth)

Paste filler unit model: tfm-20

- Paste filler unit model : tfm-20
- Lid pressing unit model : lp-31

Paste filler unit model: tfm-20

Tfm-20

A simple auger type solution with wiper assembly for filling high viscous pastes.

- Portable
- Ex-proof version available on request

Skus: 0.5 kg to 5 kg

Suitable for:

product:

- Grease
- Highly viscous products

Container: (open mouth / 4" mouth)

Paste filler unit model: vfm-30

Vfm-30

Paste filler unit model: tfm-20

A simple volumetric auger type solution with wiper assembly for filling high viscous liquids/pastes.

Can be combined with lidpress.

- Portable
- Ex-proof version available on request

Skus: 0.5 kg to 5 kg. In cans or 50,100 or 200 g in cans/pouches

Suitable for:

- Adhesives
- Grease
- Highly viscous products

Paste filler unit model: tfm-400

Tfm-400

A simple solution with wiper assembly for filling high viscous pastes in cartridges.

Paste filler unit model: tfm-400

Skus: 400g cartridge

Suitable for:

- Grease

Paste filler unit model: tfm-50

Tfm-50

request a quote

A simple solution with single cut-off for filling high viscous pastes.

Mostly preferred and integrated with infeed from cad grease dispensing pump.

Model tfm –50b is available with bypass arrangement option.

- Portable
- Ex-proof version available on request

Skus: 10 kg to 20 kg or 5 usg

Suitable for:

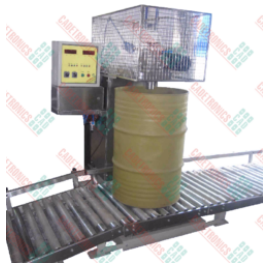

products: (non-free flowing liquids / pastes)

Paste filler unit model: tfm-400

- Adhesives
- Distemper
- Textures
- Inks
- Other viscous products

Container: (open mouth)

Barrel filler unit model: tfm-200

Tfm-200

A simple solution with single cut-off for filling high viscous pastes.

Model tfm –200bd is available with bypass and diving arrangement option.

- Portable
- Ex-proof version available on request

Skus: 200 ltr.

Suitable for:

- Grease

Barrel filler unit model: tfm-200

- Highly viscous products

Grease dispensing pump g-200

G-200

A simple press type solution to pump out grease from 200 ltr. Barrel.

Skus: 200 ltr.

Suitable for:

- Grease
- Highly viscous products

Powder packaging

Cadetronics offers solutions for packaging free flowing and non-free flowing powders like cement paint, dry putty powder etc.

Our standard models cater to accommodate skus ranging from

0.5 kg to 5 kg in pouches/cans

5kg to 40 kg in poly bags / cartons.

The machine comes with built-in weight set-up and offers high accuracy in filling process.

Ex proof model is available on request.

Model: cadp-40

request a quote

Designed for bags with top open mouth opening

Features :

- Loadcell based filler
- Vertical drop type screw feed through ground level hopper loading
- Bagging unit with mechanical clamp for easy and quick bag replacement
- Suction hood (optional)

Model: cadp-20s

request a quote

Model: cadp-40

Designed for bags with side opening

Features:

- Loadcell based filler
- Horizontal type screw feed through hopper

Model cadpt-40

- Twin head model

request a quote

Designed for bags with top open mouth opening

Features:

- Loadcell based fillers
- Two bags can be filled simultaneously
- Vertical drop type screw feed through hopper loading
- Hopper capacity: 2 ton or as required

Model cadpt-40

- Bagging unit with mechanical clamp for easy and quick bag replacement
- Suction hood (optional)

Automatic packaging lines

Benefits of automation:

- High speed
- Higher accuracy
- Advanced technology
- Continuous operation
- Smart operation
- Online monitoring
- Easy troubleshooting
- Detailed reports

With the emerging technology, we at cadetronics offer total turnkey solutions and material handling solutions to your needs.

Specialised in paint and lubricants packaging we have engineer solutions for petrochemicals, powder, coatings, adhesives, etc each industry.

We design and manufacture a range automatic solutions for packaging 50 ml to 200 lit. (50 gallon) suitable for metal cans and plastic pails/bottles.

We also offer complete container handling systems including any of following ancillary machinery.

- Can feeder
- Pail de-nester
- Conveyors
- Lid dispenser
- Pail lid placer
- Can orientation for ink-jet printing
- Lid presser
- Crown lid lug crimping tool
- Auto cartoning solutions
- Palletising solutions
