

## Cone Crushers Machines

BuildMate offers GP & HP series cone crushers for secondary and tertiary crushing applications. The robust design along with high quality BuildMate components and optimized wear parts make it possible to maintain high crushing performance to keep production up and operating costs down.

BuildMate cone crushers feature a unique combination of cavity design, speed and throw which provides higher capacity and superior product quality in wide range of applications. These cone crushers combine extremely high performance with low production cost per ton.

### Salient features

- Increased head diameter for high production & larger feed acceptance
- Hydraulic system for easy and safety setting adjustments
- 3- Auto lubrication for greater reliability
- Low power consumption

### Options

- Auto setting adjustments
- Automatic tramp release
