

# Cone Crushers

## Cone EC Series

EC Series cone crushers have changed the industry, and carry on that tradition of innovation with the next generation. The EC series cone crushers provide unbeatable performance in secondary and tertiary applications. They provide high product yield with desired shape and gradation. The EC-Series cones are a revolutionary combination of optimized speed and cavity design, which provides higher capacity, better product quality, and the ability to process a wider variety of materials. They have brought a new level of performance to the crushing industry, one that only Hailstone can deliver. Made to work, built to last and great savings on your operation.

## Highlights

- Consistency in production
- Better shaped products
- Less down time
- High Density Chamber
- Durable design
