

Forced Mixers

Force blender efficiently mixes quickly and quiet materials such as use, leveling compound, fix and multicomponent material to, among other things, masonry, tiling and flooring. The mixture becomes very homogeneous, better than in a freeze or through flow mixer and most dry or wet mixtures with high or low viscosity can be mixed. We sell IMER's compulsory mixer, with great emphasis on user and machine safety. As a complement to IMER's compulsory mixer, we also have a small quality mixer from German LESCHA.
