

Band Dryer

TIGL's technically advanced apron-type band dryer offers you a robust solution in terms of process and quality.

The dryer has been developed for quality output of DC at a range of temperatures between 60C and 130C.

Capacity: Available in a range of capacities from 500 kg/hr. output

Salient Features & Advantages

- **Insulated dryer side panels with hinged doors**
- **Self-draining dryer floor sloped adequately to aid in cleaning with drain collections**
- **Dryer bed with SS 304, micro-mesh hinged slat type apron trays conveyed by hardened steel roller chain**
- **Multiple temperature zones, each stage having heat exchangers and temperature controller**
- **Automatic dryer conveyor chain lubricating system inclusive of pump**
- **Adjustable air flow volume and humidity control**
- **Recycling of exhaust air**
- **PLC controlled with HMI**
