

Humidification Plants

we have emerged as one of the renowned manufacturers and suppliers of air controlling equipment, fans, filters and other air cleaning equipment. These are manufactured using quality material and available in different dimensions & specifications. Our range of air controlling equipment, fans, filters and other air cleaning equipment is well known for its durability, optimum

performance, low power consumption and low maintenance. With our state-of-the-art technology, HiTech equipment manufacture a wide range of Humidification Plant. Our range of Humidification Plants caters to the needs of textile industries and helps to manufacture yarns of various garments. We offer these plants in customized specifications as per the demands of our valued clients.

Our humidification of indoor air for thermal comfort. In a broader sense, the term can refer to any form of cooling and heating, ventilation, or disinfection that modifies the condition of air. An air conditioner (often referred to as AC or air con.) is an appliance system, or machine designed to stabilise the air temperature and humidity within an area to use for cooling as well as heating depending on the air properties at a given time, typically using a refrigeration cycle but sometimes using evaporation.

Features of Humidification Plant

1. Longer functional life,
2. Easy to install,
3. Application specific design,
4. Precision functionality

Applications of Humidification Plant

1. Spinning mills
2. Textile industries
3. Movie theatre
4. Data centers
5. Textile factories
6. Physical testing facilities
7. Plants and farm growing areas
8. Nuclear facilities
9. Chemical and biological laboratories
10. Mines
11. Industrial environments
12. Food cooking and processing areas
