

## Industrial Burners

Enriched with a vast industrial experience, we are involved in manufacturing, exporting, and supplying a wide range of Light Oil Burners. This offered burner is engineered by using the premium quality raw material, obtained from the trusted vendors of the market. This product is known for its energy efficiency, excellent heating functionality, low maintenance, and long working life. The offered burner is widely used in varied industries, owing to its constant and regular heating. Moreover, clients can avail this product from us at a reasonable price.

### Main Features

- New control box Thermowatt allowing to improve the interface with service personnel; the digital display (PAB versions) featuring the interactive language with pictograms gives real time information about burner operation and statistics stored during the heating season.
- High efficiency fan ventilation system (HPV) allowing easy matching with boilers having high combustion chamber back pressure.
- Electrical wiring simple to disassemble for easy maintenance.
- Combustion head easy to assemble and adjust for fine set up.
- Single bolt burner fixing with the possibility to firmly secure it to the flange in three different positions for easier maintenance.
- Air damper with progressive micrometric air regulation adjustable in three positions.
- Monoblock electrodes for easy and steady installation into the nozzle even after maintenance.
- Low NOx version class 3 with yellow flame developed by Ecoflam.
- Selected models are available in HT version and with “D” pump for light oil with viscosity up to 200 cTs.
- The hinge flange allows accessibility to burner head without losing burner settings.
- MAX 1 ÷ 12 work with electrical frequency 50-60 Hz.
