

## Belt Conveyor

We are engaged in manufacturing Conveyors that is assured to have high quality standards. These include Belt Conveyors, Portable Belt Conveyors and Flat Belt Conveyors. Our entire range of industrial conveyors is custom made as per the specific technical details given to us by our clients. The equipment helps in reducing the man power requirement and is available as per the capacity of plants. Our range of Industrial Conveyor is mentioned below

We are offering Belt Conveyors that are known for meeting the severe adverse working conditions. These are appreciated by the clients for less maintenance, easy operation and long serviceability. To meet the specific requirement of our clients, we provide belt conveyors having 300 tons per hour (TPH). Available in horizontal and inclined type, these flat belt conveyors are extensively used for bag carrying, cartoon carrying, picking and sorting component assemblies, packaging, inspection, filling, wrapping and labeling.

## Portable Belt Conveyor

We offer Portable Belt Conveyors that are perfect to use for all types of powered system. Offering flexibility of conveying path such as inclination, curve, long term dependability and low operational cost, these Portable Belt Conveyors are assured to have high quality standards. Our Portable Belt Conveyors are capable of conveying regular or irregular shaped products from light to medium loads.

## Flat Belt Conveyor

We are offering Flat Belt Conveyors that are perfect to use for light- and medium weight loads between operations, levels and buildings. These are considered to be very useful when the conveyor path has an incline or decline. Flat Belt Conveyor are supplied for handling bags ie cement, sugar, chemical, cartoon etc with plain or rough top belt depending upon the requirement. We had also supplied Side wall type Belt conveyor with steep inclination for handling chemical, sulphur, minerals, these are used where spaced is the limitation with low maintenance & operation cost
