

Magnetic Separator

Gayatri magnet is leading name as the **Magnetic separator manufacturer, supplier and exporter in India** and our separators are used in many different types of industries. They are widely used for flour mills, Rice mill, Cattle feed plant, Minerals and many other industries such as

- Food Industry.
- Agro products.
- Chemical industry.
- Pharmaceutical Industry
- Minerals Industries
- Ceramics Industries
- Spices, Paper, Sugar Industries

Gayatri magnet's Magnetic separator machine is used for separating iron material from nonmagnetic material processed in bulk quantity. They are also used for recovery of metal which has high commercial value, for the purification of products or for protection of processing machinery and plant. Magnetic separators are used for installation at the outlet of different machines such as separation

machine, screw conveyor, grinding machine and mixtures. Magnetic drum consists of high-intensity rare earth magnets. Flanged type connections for inlet and outlet are provided.

Our machines are available for installation in different feed lines such as at the outlet of the screw conveyor, elevator and many more. They consist of high-intensity rare earth magnet or strontium.

We are very well concerned about customer satisfaction so that we have adopted many customer centric policies for customer loyalty. We ensures only best product in terms of design, performance and quality reach the market, that is why our each product is passes through strict quality check by our quality control professionals. We are fully aware towards our responsibility to cater needs and requirements of client and we are well known name for the quality we provide to our each of client.

Salient Features

- ☒ Drum consists of High Coactivity Permanent Magnets
- ☒ Strong construction.
- ☒ Separation of Iron Impurities.
- ☒ Protection from dust and pollution by its enclosed design
