

Potato Dryer

The Allround Potato dryer is designed to dry potatoes after washing. This is done by felt rollers. These felt rollers absorb water that comes with the potatoes after washing. In their turn, these felt rollers are wringed out by stainless steel rollers. The machine is equipped with stainless steel plates, to ensure durability of the machine.

DR 60-10

Total width machine	2000 mm
Length of rollers	600 mm
Number of rollers	10
