

## Butterfly Valves

We source and supply a quality range of Butterfly Valves that is designed to stop or slow air or product flow by means of a turning disk. Further, these can be used in gravity flow or pneumatic systems, and can have manual or pneumatic actuators. We use very sophisticated techniques while manufacturing these products so that the total performance is guaranteed. Available in various specifications, these Butterfly Valves can also be custom made as per the clients specific requirements.

### Wafer Type Butterfly Valves

- Design Wafer Type
- Material CS / CI / SS
- Type Lever & Gear Operated
- Brand Racer
