

Heat Exchanger

Yogeshwar Industries designs Heat Exchangers as per international codes and standards like ASME standards TEMA specification.

All material procured from reputed suppliers who can deliver plates of approved and recognized steel manufacturers with test certificates to give best quality of Heat Exchanger to end user.

Non destructive and destructive testing methods used to check quality of our fabrication to ensure quality as per commitment we have done to client.

Different types of Heat Exchangers

- ◆ Condensers
- ◆ Re boilers
- ◆ U tube heat Exchanger
- ◆ Falling film evaporators
- ◆ Fixed tube sheet
- ◆ Removable tube bundle

Design Capacity Range

Capacity Range

0.1m² to 500m²

Pressure Range

Full Vacuum to 50kg/cm²g

Temperature Range

Cryogenic to 350°C
