

Rubber Hoses

We at Jain Hydraulics & Pneumatics Bangalore are pleased to offer Industrial Rubber Hose to our esteemed clients that are having high-end features and made by using the finest-grade raw materials in compliance with the highest industry standards of quality.

These find their applications in supplying of fluids to valves, hydraulic components and actuators. We offer to customize these as per customer specifications with impeccable dimensional accuracy and offer these at the lowest price possible.

Features:

- Highly durable & economical.
- Better pressure resistance coz rubber hoses are reinforced with fibers or steel cords.
- Flexible & Compatible with Hydraulic machines.

Applications:

Recommended for all Air and Water applications requiring maximum flexibility in Engineering Industry, Workshops, Shipyards, and Irrigation etc.

Designed for heavy duty water suction and discharge service, where rugged yet flexible hose is required both for dewatering and Delivery process during excavation of mines, construction project, deflecting operations and for handling sewage waste water and mud.
