

Magnetic Drum

Jaykrishna Magnetics Pvt. Ltd. has specially designed magnetic drum which easily removes magnetic or iron contaminants from minerals, refractories, food product, glass, slag, ores etc. Its rugged construction is ideal for separating ferrous metals from a material such as shredded cars, slag, crushed ore, and ash at mass burn plants. Our drum magnetic is widely used in processing industry or powerful enough to remove tramp iron from heavy flows of bulk materials, including large and high abrasive materials.

Salient Features:

- Robust design
- Strong and rugged construction
- Completely enclosed design to avoid pollution
- Low maintenance
- Rare earth permanent magnets
