

Cat Engines

Be it generator sets or ships, these CAT Marine Engines are used in diverse application areas owing to their lower cost of ownership, excellent speed range and convenient installation. Whenever the user is concerned for high annual operating hours get hold on this CAT Marine Engine.

Our experienced technicians are supported by an extensive knowledge base. Regular training and critical resources such as calibrated tools, diagnostic and special CAT tools and documentation enables our manpower to carry out reliable on site repairs. All maintenance and repair procedures are carried out to CAT specifications and to our stringent Quality procedures. We specialize in servicing the CAT D -399 series and the 3500 series engines with electronic controls. We support our customers with planning for overhauls, optimizing operations and procuring genuine spares.
