

Ceramic Magnets

Precisely composed of strontium carbonate and iron oxide, Ceramic Magnets appear in the forms of discs, rings, blocks, cylinders and arcs for motors. We have attained excellence in manufacturing, exporting and supplying an assortment of top graded Ceramic Magnets that are capable of storing stronger magnetic fields than iron itself. Ceramic Magnets are brittle in nature and are packed in high grade packaging. You can purchase Ceramic Magnets at reasonable prices.

Product Details

- Thickness = 0-10mm, 30-40mm, 40-50mm
- Application = Electrical Use, Industrial Use
- Surface Finishing = Polished
- Features = Durable, High Coercivity, Modern Anisotropic, Prefect Finished

Business Type	Manufacturer, Exporter, Supplier, Retailer
Size	100/50/10, 120/60/15, 140/70/20, 160/80/25, 180/100/30
Material	Ceramic
Diameter	0-50mm, 100-150mm, 250mm, 50-100mm
