

Sump Cleaner

Oilmax Coolant / Sump Cleaner removes sludge, metal chips & swarf from Coolant/ Oil tanks & filters it via reusable steel mesh filter. The System Works on the Principle of Vacuum Suction. A powerful vacuum blower creates vacuum in the tank of the unit, which sucks in coolant, metal chips swarf etc, passing it through mesh basket. Contamination gets collected in the basket & clean coolant flows through to the tank of the unit. A centrifugal delivery pump delivers back the clean coolant.
