

Magnetic Separator

Magnetic Separators can very effectively separate Iron/Ferrous particles from any material within its range. MCI has supplied Magnetic Separators to several thermal power stations in India (NTPC, PSEB, TATA POWER etc). Many magnetic separators are supplied to chemical, food processing industries, ceramics, silica, quartz, glass chips and glass raw material industries. Sugar Plants, etc.

There are various methods by which tramp iron particles can be separated from raw material. They can be either electromagnetic type or permanent magnetic type. The various types are listed below:
