

EOT Cranes

Product Description

EOT Cranes: As the name suggests Electric Overhead Travelling Cranes travel on rails placed on gantry at an elevated level. Depending on usage, space and cost constraints EOT cranes can be classified into three broad categories which are listed below.

- Single Girder Cranes
- Double Girder Cranes
- Under Slung Cranes

A.P. Industries provide gantry cranes customized for Safe working load, span, lifting height, cantilever sections, motion speeds, class of duty and other factors depending on customer requirement. Power supply for gantry cranes are provided through DG set, shrouded bus bar or angle iron bus bar depending on site conditions.
