

Ball Valve

- Our range of products are designed specially for the clients who believe in best
- In order to offer the finest quality products our company remains highly aimed and this helps us to design the Precision Turned Components. These components are perfectly threaded
- Any kind of Precision Turned Component or forge parts can be developed and supplied exactly as per customer specifications, design and requirement
- Our valves is used in Water, Gas, Dairy, Air Parts and Agriculture Industry Parts

Size:

- In regular - 1/2" To 2"
- In as per order - Above 2" To 8"
- We develop customize all types of Brass Ball Valve as per technical drawing or other relevant data

Threads:

- ISO Metric (BSP)

Specification:

- Durable for high temperature applications
- **Material Grades:** CuZn39Pb3, CW614N, CW602N, CZ132, C35330
- **Material:** Brass, Any special brass material compositions as per customer's requirement
- **Surface:** Natural, Nickel plated, Chrome plated, Tin plated, or any coating as per customer specification

Features

- Quality pipe fitting
- Made of Brass Extrusion & Forge
- Easy to use

Capabilities

- Threads manufactured to highest quality standards and tolerances
- Minimal vibration resistance
- Easy to install
- **Plating:** In Micron (Nickel, Zinc, Tin, Chrome, and Brass & as per requirement...)
