

## Welding Turntables

Our welding turntables are designed to provide accurate and steady rotation from the smallest to the largest work pieces . We do manufacture custom built models to customers requirements.

### Features

- Heavy Duty construction
- AC geared motors with VFD ensures smooth and steady rotation rates
- Rotation speeds are infinitely variable in both forward and reverse directions .
- Taper roller bearings ensure a steady weld ground .
- Encoder mounting facility available for automation needs
- Options available for hands free operation
