

Peristaltic Pumps

Our company has mastered the art of manufacturing high heavy duty Peristaltic Pumps that are in great demand. These Peristaltic Industrial Pumps are widely used because of their precise design and various functions. They can be used in various industrial applications. Our company has maintained a strong hold in international market among the leading Peristaltic Pumps Exporters.

Salient Features

- Mono Block/Coupled
- Flow rates ranging from 20 micro Lt./Min to 95 Lt./Min
- Offers Solutions for pH control, temperature control, foam control and many other industrial process parameters control
- Offers pumps with accuracy better than 0.5% and expertise in pulsation dampener solutions
- Offers wide range of food grade quality tubes, lab tubes, chemical resistance tube & industrial hoses etc.

- Continuous duty pumps capable of running 24 x 7 all year Round
- Micro controller based control circuits
- Precise Plum based DC stepper motor drive
- Menu driven LCD readout for flow rate/ RPM and time selection
- Switches for On / Off, menu, digit select, Increase, priming, direction reversal functions
- Advanced EEPROM technology without any battery backup (Memory retention of the stored parameters for more than live years)
- Provision for external control by means of a foot switch/ relay contacts.
- Operates on 230 v, 50 Hz, single phase AC
- Models for Dual / Four/ multichannels are available.

Applications

Bottle / Pouch Filling, Dosing, Tablet Coating, Spray Coating, Ice Cream / Cake industries, Adhesives, etc.
