

## ***Goods Lifts***

"LIFT UP" Cage Lift / Goods Lift is a product backed by 38 years of manufacturing experience. It is manufactured under stringent inspections & quality controls, using the best quality raw materials & bought outs. It is perfectly engineered to meet the client's requirements keeping in mind that it is used by such labour with little knowledge of the lift. The operation is kept very simple & markings are elaborately highlighted on the switches for the ease of the operator. The lift machine is also made keeping factor of safety in mind.

### **Specifications:**

"LIFT UP" Cage Lift / Goods Lift is a product backed by 38 years of manufacturing experience. It is manufactured under stringent inspections & quality controls, using the best quality raw material & bought outs. It is perfectly engineered to meet the client's requirements keeping in mind that it is used by such labour with little knowledge of the lift. The operation is kept very simple & markings are elaborately highlighted on the switches for the ease of the operator. The lift machine is also made keeping factor of safety in mind.

"LIFT UP" Cage Lift / Goods Lift are incorporated with all safety features

**CAGE :** Cage is fabricated from rolled steel section and M.S. plates which are strong enough & robust in construction. These cage lifts are provided with collapsible doors & landing platforms.

**HOSTING ARRANGEMENT :** In hoisting mechanism, we are providing 2/4 fall wire rope reeving system which give absolute vertical movement to cage & to arrest misalignment.

**CAGE GUIDE TRACKS :** Special machined "T" sections are used as cage guide tracks. Guides are provided on cage. Lubrication is used to reduce the friction, wear & tear between 'T' track & guide.

**CONTROL :** Controls are provided on every floor for operation of the cage.

**SAFETY FEATURES :** Electro mechanical door interlocks with limit switches are provided on collapsible gates. Lever type limit switches are provided on each floor. In addition to above limit switches a very sensitive counter limit switch is provided (in power circuit) for over hoisting & over lowering. Spring buffers are provided on the ground floor as a safety feature.

It is backed by a team of skilled professionals with excellent after sales service. Our R & D personnel are continuously improving the products, hence we reserve the right to make changes in our specifications.
