

Dryer

Hardayal Engineering Pvt Ltd is one of the **Dryer Manufacturers in India**, offering a range of standard and custom industrial dryers. We specialize in oil refinery **industrial dryers, gas dryers, filter dryers to optimize your plant process**. We have different types of dryers in our range such as **Rotary Dryers, Flash Dryers, Disk Dryers, Cascade Dryers, and Superheated Steam Dryers**.

At Hardayal Engineering Pvt Ltd, you can choose the best industrial dryers depending on your budget, space, and properties of the material to be used. Our products can help you dry a large number of range materials. These dryers can enable you to eliminate moisture from materials such as foods, powders, and chemicals for the pharmaceutical, pollution control, paper, food and agricultural industries. Our dryers for industrial purposes come with Rigid Mount with Medium Spin, Free Standing with High Spin the Hygienic Barrier with High Spin and the Professional Washer-Extractors with High Spin.

- Suitable heavy-duty framing in graded cast iron
- M.S. Fabricated Drying Cylinders with a high evaporation rate
- Mild steel fabrication to ensure maximum coverage of paper without vibration
- We have dryers with diameter of 1200mm, 1500mm, 1800mm, 2000mm, 2500mm diameter X 4800mm face
- The shell thickness of our dryers varies from 25 mm to 36 mm
- Higher working pressure up to 6.0 kgs/cm² and operating pressure: up to 4.5 kgs./cm²

Equipped with state-of-the-art technology, our dryers are not just ergonomically designed but also economical and better for the environment. With tailor-made

programs and an approximate lifetime of many years, our dryers can take care of all your laundry needs. One of the best Paper Dryer Manufacturers in India, we are a dedicated manufacturer and supplier of dryer section, comprising of a drying cylinder with a high vaporization rate. Coming equipped with advanced features, graded cast iron, and mild steel, the paper dryers have the capability to handle high working pressure.

Why Us for Dryers

As a leading dryer manufacturer, we work with a group of experienced and smart professionals who are committed for **incredible paper dryers**. These dryers are fabricated using crude material of incomparable quality, sourced from the reputable sellers in the market. The savvy cutting edge innovation and technology enable us to process out the dryer manufacturing units seamlessly. The systems are made by definitive and high evaluation headways to structure the best quality and standard of machines. Further, our dryers come with simple usage, technological reliability, and extraordinary durability.

Key Benefits of Our Industrial Dryers

- Our dryers embody technological innovation and ensure 100% efficiency
- Come with custom processing capabilities
- Have the ability to create a refined product
- Equipped with heavy-duty processing
- Ensure consistent processing
- Low emergency consumption
- They are easy to use and operate
- Come with direct and indirect heating options

When we design dryers, we consider key material characteristics such as

- The moisture level of rate materials
- Moisture goal of outlet material
- heat of the material to be handled
- Limitations of materials such as consistency, fragility, particle size, etc.
- The heat transfer properties of the material to be processed.
- Quality of the material surface: abrasive, corrosive, etc.
