

Elevator Belt

Flat belts are used in line shafting to transmit power in factories. The flat belt is a simple system of power transmission. It delivers high power for high speeds (500 hp for 10,000 ft/min), in cases of wide belts and large pulleys. Various carcass materials are available for Multiple Ply belts, depending on the application. The most highly recommended are polyester/nylon, cotton, nylon, polyester, etc. These belts can be supplied with rubber covers, friction surface, or bareback.

- **Specification**

SI standards

Available in Sizes 5? 12? width & 5-10 ply combination

Superior quality also available for heavy industries

Canvas based material made with high strength polyester nylon threads for higher durability

Rapplon High Performance Flat Belts

Used as Bucket Elevator in various industries such as Cement Plant, Cotton Ginning, Plastic, Ceramic etc.
