

Y-Strainers

These y-strainers are the once that are most commonly used in the industry. These are suitable for water, oil and gas. It has a compact design with full flow, with large filtration area for low pressure drop. The element is strengthened for its rigidity and long life

Specification

- Pressure up to 30kg/cm²
- Temperature up to 300 Celsius
- M O C CS,SS 304/316/
