

Compressor Silencer

PMT TECH can offer you the best solution for compressor /blower noise control. Our vast experiences help us to provide you the complete solution for compressor / blower noise control problem in industries.

- Suction silencer – The suction silencers are mounted at before the compressor.
- Discharge silencer – The suction silencers are mounted at after the compressor.
- Blow-off silencer in the bypass line

The noise generated by centrifugal and axial compressors depends upon rotational frequency, that is, the number of rotating compressor blade elements, Flow speed and volume flow rate.
