

Inflator Blower

The Super Flow Inflator Tool is one of the fastest filling inflator tools for dunnage air bags. For use with 2 ply air bags, its proprietary design uses ambient air to quickly fill the bags while conserving the use of air from your air compressor. Once the dunnage air bag reaches a certain level of air pressure, your air compressor kicks in to top off the bag with just the right amount of air. The Super Flow Inflator Tool has a safety shut-off feature to prevent accidental over-filling of bags.
