Inflator Gun

Inflator Gun is a fast filling inflator tool designed for use with vinyl air bags, known by the Big Foot name and also for use with the polywoven air bags

Simply put onto the valve of the dunnage bag. By pressing the trigger, the air flows into the bag within a few seconds until the bag completely fills the gap. Remove the filling device from the valve of the dunnage bag. That's it! Your transport goods are now reliably protected against slipping or tipping over.
