

## Centrifuge Bags

We manufacture Centrifuge bags which are made out of selected fabrics matching to the products porosity & rate of filtration. Loading & RPM of the Centrifuge machines have effect on the fabric strength. To maintain dimensional stability only heat set & scoured fabrics are highly suitable.

Centrifuge is the common media for separation of solid from liquid. The centrifuge bags filter contain a basket that has centrifuge bags and is placed to retain the solid to the basket. These centrifuge bags are offered in an assortment of specifications and can also be modified as demanded by the clients.
