

Vibro Screen

Vibro Screen or Gyro Screen or Gyratory screen are the circular screens operating with special Vibro Motor imparting vibration in multiple directions to the screen assembly.

The complete machine consists of a Vibration generating base which houses the Vibro Motor and Screening Assembly with wire mesh or perforated /slotted sheet.

The material fed on the screen travels above the screen or passes through the screen depending upon its particle size and nature.

Application : To separate specific sized material or powder like 18/20/22/30/40 mesh etc.

Plastic processing machinery manufacturer Invoit Plast Machinery Pvt. Ltd. located in Ahmedabad, Gujarat, India., is most trusted supplier of vibro screen to Indian cities more specifically Hyderabad, Nasik, Chennai, Baroda, Bangalore and Rajkot.
