

## Pot Strainers

Betaflo Pot Strainer are manufactured in a wide range of required specification, temperature /pressure rating to meet straining requirements in the field of HVAC, FIRE fighting and power stations for water and oil applications.

Application : These Strainers are used for industrial use and recommended for the HAVC systems ,petro chemicals, textile,agriculture fire fightingetc .ideally to prevent the costly system from sediments and impurities and cover all need of straining specifically.

### POT Strainer – Salient Features

- Full size capacity flow though full size inlet/outlet connection with large free flow filtration area to minimize pressure drop and screen clogging problems.
- The bonnet is connected with nuts to access the filter basket easily.
- Drain plug is provided in the bottom to clean the sediments without opening the strainer.
- Availability : These potstrainer are available in normal and SSPL specification series.

P.No.	
Normal sizes	40mm to 300 mm
SSPL SIZE	50MM TO 600MM
PRESSURE RATING	200PSI/300PSI

P.No.	
FLANGES ASA 150/IS	1657/BS 10 TABLE D/TABLE E.
