

Motorized Butterfly Valves

Specially designed induction motor to generate high starting torque & high efficiency inbuilt with thermal protection

The salient features include :-

- Powerful Function
- Compact Design
- Light Weight
- Beautiful appearance : Alloy die casting body
- Specially design worn-worm wheel for high strength and
- Super wear resistance : Forged with special copper alloy
- Waterproof, antirust & anti-corrosion design
- Could be installed in any angle / position
- ISO 5211 mounting base
- Maintainance free – Fit & Forget type
- Duty : On – Off Inching / Modulating
- Detachable type hand lever
- Specially designed induction motor to generate high starting torque & high efficiency inbuilt with thermal protection
