

Piston Valves

Piston valves can be provided with additional feature like :-

Regulating Piston/Lantern Bush; for coarse regulating/Throttling operation

Extended Spindle: For Cryogenic application/Hot media to prevent heat transfer to H/W and aid handling of valve

Heating Jacket: For Media that tends to solidify/crystallize at low temperature and needs constant heating by either steam/Thermic oils circulated through the Jacket.

Pneumatic, Hydraulic or Electrical Actuator: For remote operating of the Valves

Features :-

- Economic, easy to service
- Absolutely leak-tight across the ports and to the atmosphere
- No erosion of sealing surface
- Saves energy and does not contaminate the environment
- Maintenance free
