

PET Strap

"PET Straps" is designed for medium to heavy-duty palletising and unitising applications and can be applied by hand tools or power strapping equipment. This strapping material gives higher break strengths and maintains a higher level of retained strap tension than polypropylene

strapping for maximum load stability. This makes it ideal for signature bundles and palletised loads of printed materials that tend to shift during handling and transit.

Available in sizes ranging from 9mm to 16mm with embossing and without embossing.

Features

Pet strapping is Excellent solutions for maximum cargo safety

Widely used in paper, aluminum, steel, wood, wooden packaging, chemical fiber, cotton, tobacco, chemical, metal products industries.

- Saves cost, compared to Steel strapping
- Light in weight
- Heat sealable by manual/ automatic strapping tools
- Elongates 5-10% to withstand stress and resists shock
- Impervious to rust/ rot
- Safer to use. No sharp edges, eliminates backlash.
