Wrapping Film

"Wrapping Film" is the ideal solution for ensuring the stability of palletized and unitized loads and facilitating intact loading, transportation and unloading.

They are specially manufactured to stretch up to 300% depending on the gauge. This enables more pallet loads per roll to be wrapped, using less film, resulting in the lowest cost per load. With high-performance film, the more it is stretched, the more the film recovers to hold loads tight and prevent product damage.

Our power prestretch equipment, machine grade film line consists of one-sided, two-sided, differential cling and ultraviolet inhibiting cast and blown films.

1.Clear Film: Mini Film / Hand Film / Machine Film/ Jumbo Roll Film 2. Color Film:Transparent / Black / Red / Green / Blue / Yellow / Pink (Customized)

Stretch Film Introduction

Stretch wrapping is a leading method for unitizing, bundling and pallet wrapping of goods. Therefore, Zilipacking provides successful customers worldwide with Stretch Wrap Packing solutions. Polyethylene packing has a considerable impact on the way we handle both industrial and consumer goods since it was first developed. There is no other packing that offers the same advantages at the same cost. Stretch Film is an easy and effective way to secure palletized goods and help to avoid dirt and moisture.

Stretch Film Application
We Create Safety

Stretch film has become the most important method of unitizing product loads for transport.Such as Packaging , Textile and Apparel, Food Cling , Agriculture, Gift Packaging, Industry, Glass Protection...etc
