

## Tube Mill

### Salient Features :

The advance in technology has propelled the developments in the design of ERW tube mills. The requirement for higher production standards are on the increase, together with the greater demand for reliability. BSMW prioritize our technology to produce reliable tube mill lines that matches long term investment plan of mill owner. Reliability translates to smooth running mills with minimum maintenance cost. We design and build whole production line from coil entry to pipe run out / bundling systems; with automated transfer for pipe finishing operation.
