

Reverse Osmosis

RO is increasingly becoming the technology of choice for many water treatment applications. RO yield & membrane life is adversely affected by the influent water quality and needs proper treatment.

- Biocides and disinfectants
- Scale inhibitors & Corrosion inhibitors
- Membrane cleaners

FOR R.O. & RAW WATER TREATMENT PLANT CHEMICALS

1	Ferric Chloride
2	Activated Carbon
3	NON-TOXIC Polyelectrolyte.
4	Antisclant for Membrane, Citric Acid
5	Filter cartridge
6	Sodium Meta Bi Sulphite, Sodium Sulphite, Sodium Bi Sulphite
