## BEST A GRADE COMMERCIAL & INDUSTRIAL SLINGS DEALER IN TAMIL NADU, INDIA

We are engaged in offering the best quality Polyester Slings. These slings are made by using 100% polyester materials to fulfill the varied requirements of our valued clients. The offered slings are available in various colors and sizes. Our

customers can avail of those slings in different sizes and lengths according to the business requirements. The capacity of Slings depends upon the fabrications material, though and the standard capacity is in-between 1T to 12T. We provide our clients these slings with the best quality at industry-leading low Costs. India Chain and Slings (ICS) - Industrial lifting Slings dealers are at the heart of most overhead lifting operations in India.

Slings are a type of rigging equipment that are used to lift, move, and secure heavy loads. They are made up of a variety of materials, including wire rope, chain, and webbing. The most common types of slings include:

- 1) Wire rope slings: These slings are made up of wire rope and are known for their strength and durability. They are commonly used in construction, mining, and heavy industry.
- 2) Chain slings: Chain slings are made up of chain links and are known for their strength and durability. They are commonly used in heavy industry and are often used in conjunction with wire rope slings.
- 3) Web slings: Web slings are made up of webbing and are known for their flexibility and ease of use. They are commonly used in construction, manufacturing, and transportation.
- 4) Synthetic slings : Synthetic slings are made of synthetic materials such as polyester, nylon, or polypropylene. They are known for their high strength-to-weight ratio, UV resistance, and ability to handle a wide range of temperatures.

All slings are subject to inspection, proper usage, and maintenance to ensure they are in good condition and safe to use. It is also important to follow proper rigging techniques and to use the correct type of sling for the load and the environment.

India Chain and Slings specializes in the sale and distribution of slings and other rigging equipment. India Chain and Slings typically offer a wide range of slings, including different types, sizes, and grades of slings, as well as related products such as rigging hardware, wire rope, and cable assemblies. India Chain and Slings often have a team of experts who can help customers select the right product for their specific application, provide technical support, and installation instructions. We offer custom fabrication services, such as cutting and splicing slings to meet specific lengths and configurations. We are also responsible for ensuring that the slings they sell meet the industry standards, and are safe for use.

### *Our Product Specifications*

These are special type of slings used for lifting products requiring wider support / holding while lifting. These slings provide wide contact to surface area of the product for minimum slip age and even distribution of load on to sling while lifting.

### *Our Product Features*

- Easy to use
- Hassle free performance
- User-friendly controls
- Longer working life
- Highly resilient design
- Available in colors
- High tensile strength
- High durability
