

Powder Coating

Powder coating fits on different types of goods and materials.

From small, advanced details, with a lot of masking to large, coarser details and everything from aluminum to steel. We handle both large series as well as smaller individual details.

To ensure a high quality, the goods are pre-treated in one of our alkaline washings, and undergo an iron phosphatization. Depending on pre-treatment, powder coating fits in indoor environments as well as in tough outdoor environments that require high outdoor resistance.

At Stallarholmsvägen 49 we can receive goods up to 3.00 meters in length, 1.10 meters in height and 0.50 meters in width.
